This has worked well, and parents could afford to pay, one dollar each term. This has worked well, and removes, or at least lessens, the difficulty in regard to cost. Mr. W. T. Harris, the superintendent of schools, reports that under reasonably competent teachers the results obtained by these schools are good physical development, quickness of invention, great skill in the use of the invention, great skill in the use of the hands, ability to form rapid judgments specifications by remorselessly relusing in numbers, measure and size, and polite-ness of manner. We will give our readers the initial statement upon which if they will take the trouble to keep the run of Council reports as published monthly, they can base a correct estimate of the advantages of the contract system. The gross amount of the bills submitted by the Committee on Streets and Alleys for the month of April was \$5,709 61, of which \$2,884 37 was for labor on the streets done under the supervision of the Street Commissioner. All curbing and crossings are done by contract, as well as repairs on sewers and the construction of the supervision of the Street Commissioner. those who have observed the manner in which similar work has been done here-tofore, will need no argument to convince them that the city fathers have made another most commendable departure. The work has never been done except in one or two instances, notably the Main street hill improvement, for anything like that sum. Unfortunately for exactness the street paving has been done under such a love system, or rather there has been such an entire lack of system, that it is impossible to say what has been the average cost of the work. But we presume that experienced Councilmen will agree that it has cost the city heretofore from a dollar and cost the city heretofore from a dollar and otherwise, being opened with prayer and therewise, being opened with prayer and

a half to three dollars a square yard.

Those who have heard Councilmen relate their observations in open meeting, or who have observed for themselves the groups of half employed meeting, or who have observed for themselves the groups of half employed meeting, or who have observed for themselves the groups of half employed meeting over the patch work in some gutter, need not be told that our whole system of not the told that our whole system of the manner of the contracts and the only wonder is that Council has not inaugurated a change years ago. The system of contracts work will relieve the Street Commissioner of everything words of the colored race. He great friend the following appropriate carripture texts are chisselled: "For the experiment has to run the test of time. Of course it is too soon to form a definite idea of the advantages of the new system, farther than that so far it appears too working well. We presume that if the contractor has not miscalculated the expense he will continue to the cod of the year with the same thoroughness that has thus far characterized his work.

This April bill of the Commissioner was at the rate, in round numbers, of \$35,000 per annum, and but a small portion of it for permanent improvements. It is safe to estimate that that portion of the Street Department under the charge of Contractor Haley has cost the city heretofore, and in the month of April, under Commissioner White, was costing the city, not less than \$10,000 a year.
